## PRESS RELEASE

Subject: Wapogasset/Bear Trap Lakes Improvement Association Healthy Lakes Program

Mike Seidl, Chairman of the Wapogasset/Bear Trap Lakes Improvement Association Healthy Lakes Program, announced the completion of a Healthy Lakes project on Bear Trap lake for Craig and Karen DiLorenzo.

Left to right: Mark Jacobson, Lake Management and Healthy Lakes committee member, Craig DiLorenzo, property owner, Mike Seidl, Healthy Lakes Committee Chairperson shown presenting Craig his contribution check for the Healthy Lakes Grant project.

The Wisconsin DNR's Healthy Lakes & Rivers Program goal is to protect and improve the health of our lakes and rivers by increasing shoreland property owner participation in habitat restoration and runoff and erosion control projects. The Program offers DNR-funded, cost-share grants for Healthy Lakes & Rivers practices through lake and river organizations and local governments.

The DiLorenzo's project entailed a series of water run-off diversion and rock infiltration pits to collect and contain water run-off and contaminants from entry into Bear Trap lake.

For further information or details about the Healthy Lakes & Rivers program for our two lakes please visit our website: <https://www.wbtlakes.com> and search for the Healthy Lakes information tab.
